

SAP S/4HANA Embedded Analytics Workshop

SO, YOU'VE INTRODUCED S/4HANA. WHAT NOW?

You have **successfully introduced S/4HANA** and, in so doing, have taken an essential step towards powerful real-time evaluations and integrated reporting. Removing the separation between analytical and operational systems gives you direct access to operational data. It also eliminates unnecessary data redundancies. Regardless of the data source, SAP S/4HANA processes even the largest data volumes in the shortest possible time.

We show you **what Embedded Analytics means in S/4** and what **possibilities** it offers.

You will get to know the **technical basics** (ABAP CDS Views) and experience the **seamless transition** from transactional apps to analytical apps – powered by Fiori.

When new analytics and reporting requirements arise, you always have to ask yourself: **HOW DO YOU MAKE THE INFORMATION AVAILABLE TO USERS, DIRECTLY IN S/4 OR BY MEANS OF DETOURS IN THE DATA WAREHOUSE?**

We work together with you to develop **your new analytics landscape** and work out how Embedded Analytics can be integrated into it.

A **decision-making matrix with your own weightings** leads you to the ideal implementation for each new use case – directly in S/4 or, alternatively, through the Data Warehouse

SHARPEN YOUR ANALYTICS STRATEGY

PACKAGE 1 | STRATEGY

TANGIBLE RESULTS:

- You gain an overview of all the possibilities
- Checklist and decision-making matrix
- Specific recommendations for action for new reporting requirements
- Your roadmap = our recommendation as a basis for further action / packages

Duration | **1 day**
Price | **from 1.999€**

#ANALYTICSSTRATEGY
#ANALYTICSSTRATEGY
#ANALYTICSSTRATEGY

PACKAGE 2 | CHECK-UP & PREP

We make your S/4 system ready for Embedded Analytics, including a system check and FIORI customizing, plus catalog creation.

Duration | **3 days**

Price | **2.999€**

PACKAGE 3 | CONNECTIVITY

- We connect your S/4 system to your SAP Analytics Cloud and SAP Datasphere (both without SSO; SSO can be booked as an add-on).
- Afterwards, the SAC can be integrated directly as a front-end for Embedded Analytics and Stories in FIORI catalogs.
- When using Datasphere, you are then ready-to-go for live access and replication of your S/4 data.

Duration | **3 days**

Price | **2.999€**

PACKAGE 4 | IMPLEMENTATION

2 EMBEDDED ANALYTICS REPORTS

- Margin analysis (extended to include your individual additional fields)
- Accounts payable net sales list (supplier sales without tax and cash discount)

Duration | **2 days**

Price | **1.999€**

PACKAGE 5 | CDS BASICS

Get to know the basic concepts of CDS modeling and lay the foundation for Embedded Analytics and state-of-the-art BW data sources

Duration | **2 days' training on site**
(up to 10 people)

Price | **3.999€**
